

20. PETITION - HUNTSBURY RESIDENTS AND RATEPAYERS ASSOCIATION

The Committee considered a petition signed by approximately 200 residents requesting that:

“The City Council:

- 1. Require any future telecommunications providers such as Saturn to underground their services.*
- 2. As a matter of urgency accelerate the undergrounding of all existing overhead power services on Huntsbury Hill.”*

The Committee requested that the petition be acknowledged and the Residents Association be thanked and be advised that the City Services Committee had noted the request and would be including consideration of this topic within the current asset management review.
