

#### 4. ITEMS RECEIVED

The Committee **received** progress reports on the following issues:

- Report by the Major Projects Co-ordinator on progress with completion of the QEII pools redevelopment.
- Report by the Major Projects Co-ordinator on the project close-off/handover to the City Streets Unit. This took effect on 28 June 2000, apart from some minor maintenance and additional contractual items, which should be completed by the end of July 2000. The City Streets Unit has confirmed its acceptance of the physical works and responsibility for the management and maintenance of the Square.

The quantity surveyor/costs consultant is currently checking the claims from the Stage 4 main contractor, and it is anticipated that the final project cost and the remaining contingency sum will be reported to the August meeting of the Projects and Property Committee.

Requested reviews from the City Services Committee may lead to changes and additional work (flowers and planters etc).
