

22. TURNING POINT 2000 UPDATE

The Landscape Architect from the Environment Policy and Planning Unit reported on the landscape enhancement project on State Highway 1, as outlined at the October 1999 meeting. Tree planting in the median was to proceed, but as a consequence of some technical problems trees would not be planted in the berms at this time. Work at the Sawyers Arms/Johns Roads roundabout was also to proceed, with modifications to the design. The Board **received** the information.
