

6. COMMUNITY GARDENS - STAGE 2 PROJECT OUTLINE

The Committee considered a report from Eric Park and Muriel Bührs, Waste Management Unit, on the success of a Stage 1 pilot community gardening trial and on the draft Stage 2 project outline.

The report detailed the background to community gardening and the advantages of organic composting in terms of waste minimisation and providing composting material.

Details of the Stage 2 project outline were provided together with a draft budget.

The Committee **decided:**

1. That this Committee endorse the above project proposal for Stage 2 of the Community Gardening Project trial.
2. That progress on the Stage 2 project be reported back to this Committee in due course.
