

5. MAIDSTONE ROAD / WAIMAIRI ROAD INTERSECTION IMPROVEMENTS

Over recent months the Board has been considering the traffic options at this (boundary intersection with the Fendalton / Waimairi Community Board) site; the Council approved the installation of traffic signals, together with other associated traffic management works.

The City Streets Manager reported on the final design plans and the improvement works to be put in place during the construction stage.

The Board **received** the report, and expressed support for the intersection improvements.
