

7. WATERWAYS AND WETLANDS CAPITAL WORKS PROGRESS

On behalf of the Water Services Manager, Christine Heremaia was in attendance to discuss, with the Board, the extensive schedule of works currently programmed within the Board's area.

The programme identified 29 projects ranging from a \$5,000 retention basin to the \$390,000 Kyle Park stormwater pond and park enhancement.

Concerns were expressed about the need for ongoing maintenance of the completed sites, but did acknowledge that the Board could participate in partnership arrangements o some of the community enhancement works.

The Board **received** the information.
