

19. NORTHERN ROADING OPTIONS SCOPING STUDY - UPDATE

The report updated the Committee on progress of the Christchurch Northern Roothing Options Study (NROSS) since the previous report in December last year.

Details of the study and current programme were attached and the current programme indicated the completion date for the study of 30 August 2000.

Background to the study together with the current status were advised.

The Committee **received** the information and **decided**:

1. That the brief for the parallel study looking into alternative transport options be considered by the Land Transport Subcommittee and submitted for approval by the Council via the City Services Committee in June.
2. That the study be conducted by the Christchurch City Council in close collaboration with Environment Canterbury and the Waimakariri District Council and meetings with the two Councils be arranged as soon as convenient.
