

4. “OUR CITY” - AN ENVIRONMENT CENTRE FOR CHRISTCHURCH

A report from the Environmental Policy and Planning Manager recommended proceeding with the establishment of an Environment Centre (“Our City – past, present and future”) in the former Municipal Chambers Building, Worcester Street. The centre was intended to provide an existing and innovative addition to the assets of the city, providing opportunities to showcase civic history, current projects and future plans.

The Committee **decided** to strongly support the use of the former Municipal Chambers for the housing of “Our City – past, present and future”, when the building’s future use was considered by the Council.
