

2. DEPUTATIONS

(c) English Park - City Design and Common Ground

Crispin Schurr of City Design and James Lunday of Common Ground presented an update on the briefing, liaison and conceptual design for English Park. The proposal covered aspects of landscaping, lighting, traffic issues, extra stadium seating, relocation of pitch, water features, further public consultation, the creation of more public space, school and community access and parking. It was noted local knowledge is available on the sites and history of artesian springs in the area. The concept design will be presented to the Board at a future seminar and then to the June meeting of the Parks and Recreation Committee.
