

6. SAFETY WORKS MARSHLAND ROAD, HAWKINS ROAD AND LOWER STYX ROAD INTERSECTION

A report from the Transportation Safety Engineer informed the Board of the Safety Capital Works Project proposed for the rural crossroads of Marshland Road, Hawkins Road and Lower Styx Road in the 2001/02 financial year. As the work involves the closure of Hawkins Road a report recommending that the Council commence the process of 'seeking the community view' is before the Shirley/Papanui Community Board. The Board **decided:**

1. That the information be received.
2. That the option of realignment of Hawkins Road be further considered and presented to the community.
3. To make sure that affected people in Marshland Road and Lower Styx Road are consulted.
