

#### 4. **BROOKHAVEN BUS SERVICE – PROPOSED NEW BUS STOP**

In considering this clause, the Board also considered three letters which had been received from residents of the Brookhaven area expressing concerns at the proposed new bus stop.

The Board had delegated to a subcommittee the task of making a decision on the location of the proposed bus stop. The report noted that the members of the subcommittee and the Area Engineer had visited Ti Rakau Drive for a site inspection immediately following the conclusion of the previous Community Board meeting held on 4 October 2000. The report outlined the investigations for possible alternative locations for this bus stop which had taken place following this site inspection.

The Board **received** the information and decided that an appropriate reply be made to the writers of the letters.
