

6. POTENTIAL VARIATION TO THE CITY PLAN ON FLOODING ISSUES

The Environmental Services Manager reported that the purpose of his report on this issue was to:

- Inform the Committee of the outcomes of the seminar meetings held with community board members on the Proposed Variation
- Present the maps which identify the areas where the minimum floor level is proposed to apply
- Inform the Committee of the proposed consultation programme for this Variation

The Committee **resolved** to endorse in principle the measures recommended in the discussion document and agreed that it should form the basis for public consultation on this issue.
