

**11. KENDAL AVENUE – TRIAL RUMBLE STRIPS**

The Committee received a report from Brian Boddy, Area Engineer, on the installation of trial rumble strips in Kendal Avenue. It is proposed that trial rumble strips consisting of 300mm wide strips of coarse chip with gaps between be installed for a 12 month trial period to create the impression to motorists that their speed has increased and cause a consequent speed decrease prior to proceeding around the corner.

The estimated cost of the work was \$800 to be financed from the Fendalton/Waimairi Community Board budget.

The Committee **decided** that the trial as detailed be approved.
