

**1. WAIWETU STREET – KERB AND CHANNEL RENEWAL  
– ‘REDUNDANT ROAD’ WIDENING**

For several months, the Board has been consulting with the local community over design options for Waiwetu Street, which is soon to be reconstructed.

Utilisation of the ‘redundant’ road widening is not required as part of the work and accordingly the Board supports steps being taken to dispose of the affected land across several property frontages to the adjoining land owners.

Clause 16 of this report (Part C) details the Board’s decision to proceed with the project based on the adoption of a modified plan arising from the second round of public consultation.

**Recommendation:** That approval in principle be given to the disposal of land outside the Waiwetu Street frontage of No.168 Fendalton Road and Nos. 8, 10, 12, 14, 16 and 26 Waiwetu Street because the land is no longer required for roading purposes.
