

10. BEXLEY WETLAND RESTORATION

The Parks Manager submitted a report outlining the outcome of the investigations to determine the best method of treating the contaminated site within Bexley Wetland and seeking approval to reallocate funding for the remedial work.

The Committee **decided** to refer the staff report to the Strategy and Resources Committee with the recommendation that \$85,000 be transferred from the Estuary Green Edge budget to the Bexley Wetland budget, to implement the preferred option outlined the report.
