

## 15. COMMUNITY GARDENS STAGE 2 UPDATE

A report compiled by the Community Gardens Facilitator and the Solid Waste Engineer from the Waste Management Unit recommended action the Burwood/Pegasus Community Board could take to consolidate and expand community gardening within its area.

It was **decided**:

1. That the Advocacy Team arrange a tour for all Board members of selected community gardens in their area/around the city.
2. That the subcommittee liaise with the Community Board Champion and report local progress back to a joint forum in February 2001.
3. That the Community Gardens Subcommittee:
  - (a) Continue to support existing community gardens.
  - (b) Promote the establishment of new community gardens by June 2001.
  - (c) Investigate and report back on setting up local tool libraries.
  - (d) Continue to promote raised gardens at Council housing units and Housing New Zealand properties.
  - (e) Promote community and home composting.
  - (f) Liaise with the Community Gardens Facilitator on how best to implement any kitchen waste collection trial in the Board's area, if at all.
