

5. TRAVIS COUNTRY DRIVE/TRAVIS ROAD

A report from the Area Engineer requested the Board to consider a petition from the residents of the Travis Country subdivision to “introduce some form of traffic control at the intersection of Travis Country Drive and Travis Road”. The Board had requested also that the report include the concern for, “the enforcement of parking and sales of cars on the grass verge area, and proposed solutions”, in front of Travis Country.

This report will be considered by the City Services Committee during the October round of meetings.

The Board **decided**:

1. That the information be received.
2. That the identified low cost safety improvements for the Travis Country Drive/Travis Road intersections proceed.
3. That the give way signs be placed against Travis Country Drive at both intersections with Travis Road.
4. That Mr Tolchard (for the residents) be informed of the Board’s decision.
5. That an overall concept plan for traffic management on Travis Road, from Frosts Road to Burwood Road, be developed and presented to the Community Board by February 2001.
