

20. **BUS STOP CHANGES: THE NEW BUS EXCHANGE**

Mr Peter Atkinson, Area Engineer, City Streets, reported on the provision of new bus stops as a result of the bus route changes associated with the new Bus Exchange. The report detailed the changes required in the inner city areas and indicated these had the support of Environment Canterbury and the Parking Operations Manager. There was agreement from property owners with some of the bus stop locations, but not others, as full public consultation had not at that stage been completed.

The Committee **decided** that this report should also be referred to the Bus Stops and Shelters Subcommittee for consideration and recommendation to the September meeting of the Council.
