

2. PETITIONS RECEIVED

2. DENTON PARK (EASTERN END) TREES

Three letters and a petition containing 26 signatures has been received from residents of Kathleen Crescent.

The petition (abridged) asks the Council to:

“....rectify the problem of the trees at the eastern end of Denton Park; related problems are.....a wind tunnel effect has been created causing a larger than normal buildup of pine needles, and rubbish.....resolved by lower plantings.....replacing the trees with another species.....”

The letters allude, also, to

- blocking out of sunlight
- house dampness
- spouting blockages
- health problems, pollen
- personal safety issues

The Area Parks Officer suggested that a new landscape plan could be initiated which met the requests of the petitioners, but which also offered enhancement to the parkscape.

The Board **decided** to refer the petition to the Board’s Environmental Committee for further consideration.
