

5. PROPOSED POWER CABLE EASEMENT – WESTLAKE PARK

The Property Manager sought Board comment on a request for the Council's consent to the creation of an easement over part of Westlake Park for the installation of a high voltage cable.

Approval to a new residential subdivision off Marquess Avenue contained a condition that an electrical service easement be sought to enable the new cable to be laid along an alignment over the park. The alignment of the easement showed the cable being laid outside existing shrub borders of the park. The consent, pursuant to Section 48 of the Reserves Act 1977, requires the Minister of Conservation's approval.

In noting that the report will be considered by the Parks and Recreation Committee (for Council approval), the Board **agreed** to support the easement request.
