

17. **WESTON ROAD - PROPOSED TRAFFIC CALMING**

Submitted for the Board's consideration were the costs associated with the various traffic calming measures considered at the public meeting held on 18 October 2001 in conjunction with the Shirley/Papanui Community Board.

The Board noted that the total costs were considerable at \$212,500 and as such it would be appropriate to review the intended measures acknowledging also the consultation process currently underway with regard to NROSS.

The Board therefore **decided** to await the outcome of the NROSS consultation currently underway and that in the interim the Works, Traffic and Environment Committee review the traffic calming measures proposed for Weston Road.

(Note: Sally Buck asked that her vote be recorded against the above decision.)
