

12. **“SAFE CYCLING TO SCHOOL” PROJECT: GREERS ROAD/MEMORIAL AVENUE INTERSECTION TO GUILDFORD ROAD**

The Committee considered a report seeking approval of the final designs for safeguarding children cycling to Burnside and Christ the King’s schools in Greers Road.

The Committee expressed its support for the measure proposed in respect of cyclists, but noted the necessity to provide for pedestrians crossing from Burnside High to catch buses on the opposite side of the road. The Committee requested that staff report further on this aspect and that, following this, a meeting be arranged with the Community Board to discuss the matter in a partnering arrangement.

The issue of student parking around schools was also raised, and the process for maintaining residential parking. It was agreed that information also be provided on this aspect.

The Committee **decided**:

1. That additional information be provided to the Committee on pedestrian safety in respect of children crossing to the bus stop opposite Burnside High School, and also on bus shelters.
2. That following this a special meeting of the Committee with the Fendalton/Waimairi Community Board be arranged in February 2002 to discuss the matter further.
