

7. **STORM 11-13 OCTOBER 2000**
FOLLOW-UP REPORT FOR FERRYMEAD WARD

The Board considered a report informing the Board of and seeking support for flood damage reduction measures within the Ferrymead Ward following the extreme storm experienced on 11 to 13 October 2000.

The Board **decided** to recommend to the Parks and Recreation Committee:

1. That the Board supports the suite of measures described in the report to be implemented within the Ferrymead Ward in response to the October 2000 storm.
2. That contracts be re-negotiated to produce higher standards based on outcomes rather than the current method.
3. That information be made public to the Heathcote and Redcliffs communities and anyone in Sumner who has not received the information about the suite of measures described in the report.

That Board also commented that any changes to zones should be raised at the time that the City Plan is considered and/or when any application for a subdivision is made.
