

3. RAISING WASTE AWARENESS – PROPOSAL BY GLASS TOWER

An apology for absence was received from the representatives from Glass Tower and a copy of their written proposal was circulated for information. It was suggested that councils should review what initiatives they were taking in their own areas and it was noted it would be desirable that any future publicity/education campaign fit in with the proposals to be contained within the RMF business plan on regional waste minimisation initiatives.

The Subcommittee received the information.
