

12. **BURNSIDE PARK – APPLICATION TO LOCATE TELECOMMUNICATION EQUIPMENT ON COUNCIL PROPERTY**

The Board was invited to provide input into the process regarding the requested installation of telecommunications equipment on the Council's water tower in Burnside Park. Officers from the Council Cell-Site office assisted the Board by elaborating on the process and the protocols in place with the companies involved.

The Board **decided** to advise the Cell-site Sub-committee of its support in principle, subject to there being no need for removal or substantial pruning of the existing trees in Burnside Park and that any associated trenching requirements be carried out in a manner that does not interfere with adjacent trees rooting systems.
