

#### 24. TELECOM CELL SITE – STYX MILL TRANSFER STATION

The Board **received** a report regarding an application to erect a 25.5 metre stand alone cell tower on the northwest corner of the Styx Mill Transfer Station site. Board members did not have any issues with the cell site, however they stated they were not happy with the consultation venue. It should have taken place in a public building, closer to the site, and been more participant friendly.
