

11. CASHEL STREET BUS STOP EXTENSION

Officer responsible City Streets Manager	Author Peter Atkinson Area Engineer Central, DDI 371-1662
Corporate Plan Output: On Street Management	

The purpose of this report is to seek approval to extend the existing bus stop terminal in Cashel Street.

The next stage with the relocation of buses from Cathedral Square and improved bus services associated with the bus exchange is the need to extend the existing bus stop terminal in Cashel Street to accommodate an extra bus. The existing bus stop is located on the north side of Cashel Street immediately to the east of the Rolleston Avenue intersection. It is proposed to extend this stop further to the east. The area where the bus stop is to be located is presently unrestricted.

This extension has been requested by Environment Canterbury, the support of the City Streets Manager and the reluctant support of the adjacent property occupier.

Subcommittee

Recommendation: That the bus stop on the northern side of Cashel Street be extended from a point 55 metres measured in an easterly direction from a point opposite the eastern kerbline of Rolleston Avenue easterly for a distance of 12 metres.
