

3. CHRISTCHURCH KART CLUB, UPDATE

The Board was in receipt of a report by the Property Manager on the current position concerning the possible relocation of the Christchurch Kart Club, currently sited at Carrs Road, to Leggets Road, Ruapuna.

The new site is to be quarried at some time in the future, and the Council is negotiating to secure sufficient (quarried) land by way of an exchange of Council-held quarry land at two other sites. If the negotiations can be successfully concluded, the Council would have to wait for the quarrying company to extract all their required shingle/minerals, this timeframe could be in the order of three to five years.

It was noted that this report was also going to the April meeting of the Parks and Recreation Committee, which will be seeking updated reports for its June meeting on the negotiations. Whilst members were accepting of the report, and the progress made to date, there were concerns with regard to possible noise levels emanating from the new (quarried) site.

(Noting that this report was to go to the Parks and Recreation Committee) in **receiving** the report, the Board asked that noise measurements be taken at the current site and the new proposed site, in an effort to allay possible concerns of local residents.
