

17. KILMARNOCK STREET – ROADMARKING UPGRADING

The Committee considered a report on the proposed improvements to the road markings in the approaches to the rail crossing and curbed section of Kilmarnock Street that provided for upgrading and widening the existing cycle lanes which involved provision of a new flush median, the installation of “Give Way” control and removal of some on street parking.

The Committee noted the objections received from some property owners in this locality on the removal of the car parking and **decided:**

That a further invitation be issued to those property owners who had expressed concerns to discuss these with a subcommittee consisting of Councillors Sally Thompson, Ron Wright and Ingrid Stonhill, should they so wish, and that the Subcommittee report back in due course.
