

4. CHARLESTON NEIGHBOURHOOD PLAN

The Board considered a report from the Urban Design Planner advising of the progress made on the Charleston Neighbourhood Plan consultation and introducing the draft plan.

The Board **received** the information and thanked Josie Schroder for her report. The Board commented that there should be a reference in the section entitled "Open Space and Greening the Area" to indicate a preference for the acquisition of more green open space.

The Board **decided** to make a further recommendation that the following statement be included in the draft plan. "That there is a road widening designation for Ferry Road in the City Plan but there are no plans as yet for the implementation."
