

#### **4. NEW RECYCLING LOGO**

The Committee considered a new recycling logo developed to promote recycling in the Christchurch City and Waimakariri District Council areas, and agreed that members of the subcommittee encourage the use of the new logo in their respective areas.

It was agreed that further details on the relationship of the colours be sent to staff members of all participating councils, and that words “recycle” would be appropriately placed in the middle of the logo.

It was agreed that members should:

1. Request the adoption of this symbol by their councils.
2. Work towards use of these colours for their materials recovery.
