

## 28. IN-VESSEL COMPOST PLANT

The Committee considered a report advising the Committee of the companies on the shortlist for tendering a proposal for the proposed in-vessel compost plant. The report provided details of the previous Council resolution, the background to the tender proposals and details of the companies listed.

A timeframe for the project was also provided together with budget details.

The Committee **received** the above information and adopted the suggested timeframe and agreed that Cycloplas (Kompogas.AG) be added to the shortlist for requests to tender.
