

2. BUS STOPS CASHEL STREET CAMBRIDGE TERRACE

The Subcommittee discussed the representations made from the Bone Marrow Transplant Unit (Ranui House) expressing concerns at the problems caused to residents from the location of the peripheral termini in the Cashel/Cambridge/Rolleston Avenue locality.

A number of options to deal with concerns which had been expressed were discussed at the meeting such as:

1. Relocation of the terminus on the existing route.
2. Relocate buses on this route to another terminal.
3. Re-routing buses via Hereford Street.
4. Noise mitigation.
5. Possible use of other parking sites for a bus terminal.

The Subcommittee **decided** that a further meeting be held on 11 June 2001 to which representatives from Environment Canterbury and the Red Bus Company be invited to discuss the matter further.
