

## 10. CO-ORDINATING COMMITTEE FOR TRAFFIC SAFETY

Ms Susan Cambridge spoke to her report and provided further statistical data relating to the number of fatalities and crashes in the Christchurch City area resulting from motor vehicles colliding with poles.

The Committee **decided**:

1. That the City Streets Manager report on the current undergrounding prioritisation methodology and options to include traffic safety considerations as suggested in the report.
2. That CCHL be requested to consider an addition to the Orion Statement of Corporate Intent whereby Orion would meet the balance of the cost of undergrounding its overhead services for traffic safety reasons for projects attracting Transfund subsidy.
