

26. SUPPORT FOR BRYNDWR COMMUNITY

The Community Advocate reported on a funding request from the Bryndwr Churches Community Support Society to engage a youth worker in the Bryndwr/Burnside area.

The intention was to carry on and address the youth issues identified by the present community worker engaged by the YMCA and to undertake community building work outlined as being needed in the 1998 Bryndwr Research Study.

The request received was similar to that from the Bishopdale Community Trust early in 2000 and from the officer's assessment of the proposal was worthy of support. Appropriate objectives and performance indicators would be developed to enable ongoing evaluations to be made of the project.

The Board **resolved**:

1. That the request from the Bryndwr Combined Churches Support Society be supported, and the sum of \$10,000 be allocated from the Board's 2000/01 Community Workers' fund.
2. That any continued funding be considered in conjunction with the "social mapping exercise" being carried out by the Community Development Adviser.
3. That the allocation be associated with the drafting of appropriate objectives and performance indicators for use in later evaluations.
4. That a progress report be submitted on the activities conducted by all organisations currently receiving funding from the Community Workers' fund later in the year.
