

5. CHRISTCHURCH PUBLIC HEALTH STRATEGY

The Board considered a report outlining the development process for the Public Health Strategy for Christchurch.

The Board **decided**:

1. That the Community Development Advisor be requested to report back regarding the implications of updating the research undertaken in 1997 "Spreydon-Heathcote Residents' Views on Health" in terms of resources required and associated costs.
2. That a representative of Healthy Christchurch be invited to attend a future special meeting of the Community Affairs Committee.
