

12. PLANTING STRATEGY

The Parks and Waterways Manager reported in response to concerns raised at earlier meetings of the Committee about the choice of plant materials for Council projects.

The Committee endorsed the staff suggestion that the seminar scheduled for 23 April be used for a joint seminar of the Parks and Recreation Committee and the Environment Committee to address this issue and also to progress the city-wide planting strategy.

The Committee **resolved** that the seminar scheduled for 23 April be the forum for progressing an integrated approach to planting in the city.
