

10. DRAFT PLAN FOR ESTUARY'S WESTERN GREEN-EDGE

The Committee received a report on the progress on the preparation of the draft plan for the long-term development of the Estuary's western Green-Edge.

The report detailed the background to the proposal, details of the concept plan, key elements, timing, budget and the consultation/information programme.

The Committee **received** the information and **decided**:

1. That car parking areas within the Green-Edge area be limited approximately to the current provision, and that additional car parking, if needed, be provided outside the Green-Edge area.
2. That provision for more comprehensive natural treatment of wastewater (nutrient take-up) over a greater portion of the Green-Edge area be made in the longer term, following the results of the experimental areas referred to in the report.
