

**17. TENDER ACCEPTANCE FOR TEMPLETON SEWER DIVERSION: CONTRACT 2000/01-236**

The Committee considered a report recommending acceptance of a tender for construction of a 2.8 km diversion to allow for closure of the Templeton Sewerage Treatment Plant.

Details of the tenders received and the work record of the recommended tender were provided in the report and it was noted that the diversion of the flow from the Templeton Treatment Plant to the Christchurch Wastewater Treatment Plant would have significant cost, social and environmental advantages.

The Committee **resolved** that the tender of Coastal Constructors of \$398,506 for Contract 2000/01–236 'Templeton Sewer Diversion' be accepted.
