

## 5. CITY STREETS ROADING PROGRAMME 2000/01 - UPDATE

The Board **received** an update report on progress relating to current roading projects being undertaken in the Fendalton/Waimairi area.

Mention was made of the ongoing difficulties being experienced with the trial ripple strips in Kendal Avenue and of the need to find a satisfactory solution. A request was also made for regular updates to be provided to members on issues affecting Fendalton Road.

Also proposed was the need to review the Council's sealing specification with regard to the use of a chip seal finish on roads alongside commercial areas in particular.
