

7. **TREES SEMINAR – 6 DECEMBER 2000**

The Board **received** a report on the outcomes from the trees seminar. The Parks and Waterways Advocate advised that tree planting needed to be a priority for Council as it takes so long to replace a mature tree once it has been removed. He also stated that the Council cannot rely on private ownership to protect mature trees, and suggested that residents be encouraged to relocate trees if they needed to be removed.
