

## 7. BURWOOD LANDFILL SITE MANAGEMENT UPDATE

The Committee considered a report from Simon Collin, Solid Waste Manager, updating Councillors with current information relating to site management issues at the Burwood Landfill.

The report provided background to the appeals to the recently granted consent to continue operating the landfill until May 2005 and discussed the issues raised during the consent hearing process relating to:

- Odour/landfill gas,
- Proximity of operations to housing,
- Leachate,
- Daily cover,
- Biosolids preparation area.

The Committee **decided** to support the preparation of estimates by staff for inclusion in the 2003/04 draft Annual Plan for dealing with the Burwood Landfill gas issue, and complying with other new consent conditions.
