

5. WOOLSTON/BURWOOD EXPRESSWAY

The Project Manager provided the Board with an update on the Woolston/Burwood Expressway, including the background to the design of the bridge underpasses and the solutions that will help to reduce the effects of the flooding, as requested by the Board. The Board **decided:**

1. That the information be received.
2. That the preferred options for the use of the surplus sites 1 and 3 be supported.
3. That further investigation of the option for site 2 of a reserve development named after Jack Hinton VC be supported.
4. That landscaping possibilities for sites 4 and 5 be supported and a report be provided on the possibility of a community garden (including fruit trees) and reserve development, with community involvement.
