

## 11. WASTEWATER COLLECTION SYSTEM PROPOSED UPGRADING

The Committee considered a report from Eric van Toor seeking endorsement of the Works Programme as previously discussed at a Committee Seminar on 13 August 2002.

The report provided an outline of the work proposed following the study undertaken by Australian Water Technologies Ltd (AWT) and the report concluded that upgrading of the system could be carried out within the existing budget and ten year Capital Works Programme. Work beyond the ten year programme would be included in the next revision of the Waste Water Asset Management Plan.

The Committee **received** the information and decided the Works Programme, as indicated in the report, be endorsed as a key element of the Waste Water Asset Management Plan.
