

5. INNES ROAD/RUTLAND STREET INTERSECTION – SUBMISSIONS TO NROSS

The Board received a summary report containing feedback from the NROSS submissions relating to the Innes/Rutland intersection.

The Board considers that the focus for this intersection is one of safety rather than traffic flows/speeds.

The Board **decided:**

1. That the community's views be sought on the proposal to install traffic signals at the Innes Road/Rutland Street intersection and the associated kerb and dish channel replacement work on the north side of Innes Road between Rutland Street and Cranford Street.
2. That consultation include a public meeting in the area for information purposes, and a questionnaire on the proposal delivered to every household in the area. The area boundaries to be Westminster Street/St Albans Street to Paparoa Street, and Cranford Street to Browns Road.

The No Way Highway and Cranford Street Action Groups and schools are also to be involved in this meeting.
