

18. CHRISTCHURCH, ROLLESTON AND ENVIRONS TRANSPORT STUDY CONTACT GROUP

The Committee considered a report from Stuart Woods, Transportation Policy Planner, seeking its confirmation of the establishment of an elected member contact group for the Christchurch, Rolleston and Environs Transport Study.

The report sought approval for the establishment of a contact group to provide a forum for discussion with elected members on progress and matters related to this study. In addition it was proposed that representation also be obtained from members of the Community Boards involved within the study area. Reporting on the study will be provided approximately bi-monthly to the Committee.

The Committee **resolved** that the elected member contact group for the purposes of liaison on the Christchurch Rolleston and Environs Transport Study consist of the Land Transport Subcommittee plus one nominee from the Spreydon/Heathcote and Fendalton/Waimairi Community Boards and two nominees from the Riccarton/Wigram Community Board.
