

1. FIREFIGHTERS RESERVE DEVELOPMENT

The Board considered a report from the Parks and Waterways Planner outlining progress on the design and development of a new central city reserve, and seeking the allocation of discretionary Board funding towards its construction. The report has also been submitted to the August meetings of the Parks, Gardens and Waterways and Sustainable Transport and Utilities Committees.

The Board noted the advice from Ms Weld that the anticipated level of corporate funding towards stage one of this project was now such that assistance from the Board's discretionary funding would not now be required.

- Recommendation:**
1. That the plan of the proposed reserve be approved.
 2. That the reserve be named "Firefighters Reserve".
