

1. RECOVERED MATERIALS FOUNDATION PRESENTATION/CHRISTCHURCH CITY COUNCIL CONTRACT

The Committee considered a supplementary report from Simon Collin, Solid Waste Manager on the draft Recovered Materials Foundation/Christchurch City Council Contract.

The report provided background to the existing contract and the operation of the Recovered Materials Foundation (RMF) together with issues to be considered in regard to any new contract relating to:

- Funding,
- Risk,
- Services being purchased by the Council,
- Kerbside promotional activity,
- Miscellaneous items.

The opportunity was taken to discuss this report prior to the main agenda item relating to the presentation by the RMF.

The Committee after consideration decided:

“That the RMF be required to operate so that where a local authority has a successful recycling operation, especially a community based one, that the activities of the RMF should reinforce it.”

The opportunity was then taken for the main item in the agenda, relating to a presentation by the RMF on the contract between the RMF and Christchurch City Council and the RMF budget, to proceed.
