

23. REMOVAL OF EUCALYPTUS TREES IN McHAFFIES PLACE RESERVE

A report from the City Arborist sought a Board decision in response to McHaffies Place residents' requests for certain Eucalyptus (gum) trees in McHaffies Place Reserve to be removed for reasons of safety, shading effects and tree litter problems. The Board **resolved**:

1. That the four gum trees numbered 1-4 on the plan attached to the report and the three willows be removed.
2. That plans for appropriate replacement planting in suitable locations in the Reserve, in consultation with the local residents, be prepared.
