

### 3. BUS XCHANGE OPERATIONAL REVIEW

The Committee **received** a report from Rob Dally (Property Manager) apprising Councillors of the issues that have led to a decision to undertake an operational review of the Bus Xchange.

The report signalled that the Bus Xchange has now been operating for a little over 12 months with excellent results from a public passenger transport perspective. However, a number of other issues including footpath/pedestrian management and traffic safety, noise and diesel pollution have been identified and require further consultation/investigation/action.

The Committee **decided** that a Subcommittee comprising the Chairs of Property & Major Projects, Strategy & Finance, Community & Leisure and Sustainable Transport & Utilities Committees, plus Councillors Baker and Sheriff be established to assist officers in dealing with the issues identified.
